About Modal	Roxanne									
				Yes Content text may be too small.						
				For fixed height accordians, the scroll bar for the content area does not become visible like in						
				the content area does not become visible like in						
				the desktop verison For fixed height accordians, the bottom grey						
				line of the row, is within the content area. When						
				you scroll down, it disappears. Determine if this is correct. See screenshot.						
Accordions	Roxanne	Yes		is correct. See screenshot.		Good	iOS/ Safari	Accordian Folder		
Alerts	Adam	Yes				Ok - icon/button size should be increased		Alerts Folder		
Badges	Adam	Yes				Good	Chrome - Android Marshmallow			
-						Buttons are large enough but spacing is				
Empty State	Leslie	Yes			No	poor, could easily mash the wrong thing.	iOS - Safari	Empty State		
Bootstrap-Combobox	Adam	Yes		Yes - zooming occurs on some screens		Ok - inputs can be made bigger	Chrome - Android Marshmallow / iOS Safari	Combobox Folde	[
						Bad but usable. Even though touch areas		Destatore		
Bootstrap-Datepicker	Andrés	Yes		Yes, typography and click areas are too small	No	are small I could select dates without problems	iOS / Safari	Bootstrap Datepicker folder		mobile Safari has an automatic zoom on forms.
Bootstrap-Select	Brian			12, 1,725-2, 1, 112		,				
Bootstrap Switch										
				Yes.						
				- Variable Row height based on control height		Bad - many controls are too small.				
Bootstrap Touchspin	Roxanne	Yes		- +/- and chevron up/down controls are too small.	Yes	Especially those stacked on top of one another. See screenshot.	iOS/ Safari	Bootstrap - Touchspin Folder		Automatic Zoom-in on forms? See screenshot.
Bootstrap Tree View										
Breadcrumbs	Adam	Yes		Wraps on smaller devices		Ok - text is small	Chrome - Android Marshmallow / iOS Safari			
						Ok - small buttons are difficult to interact				
Buttons	Adam	Yes		Yes - larger text for buttons		with	Chrome - Android Marshmallow / iOS Safari	Buttons Folder		
				Yes - for Mini Card with status & Mini Card with						
Card View - Card Variations	Dongni	Yes		text, the action menu items are too small (both control areas and font size).	N/A	Bad - control areas are too close to one another and font size is too small.	iOS - iphone7plus / Safari	Card View - Card Variations	-	
Code	Adam	Yes		and the state of t			Chrome - Android Marshmallow / iOS Safari			
				Yes, click area are too small both in the button				_ara raider		
Dropdowns	Andrés	No		1 itself and in the open menu		Bad - dropdown selectors are too small	iOS - Safari	Dropdown Folder		
				Yes - Account for zoom on Active Input State	Yes - uses native datepicker,					
Forms	Adam	Yes		w/keyboard controls	selectors and keyboard inputs	Bad - dropdown selectors are too small	iOS - Safari	Forms Folder		Automatic Zoom on Forms causing issues with responsiveness
Icons	Adam	Yes					iOS - Safari			Icons should be larger for mobile devices, especially if used as buttons or interaction points.
	· tourn			Yes			50001			
				- Touch area can be too small for some people						What are the best practices for info tip on touch screen devices? Should default state be closed or opened?
Info Tip	Dongni	Yes		The Info Tip doesn't show up by default (the desktop version has it opened by default)	N/A	Ok - some people might have hard time selecting the right one.	IOS - Safari	Info Tip		Right now on mobile, it needs two touches to get to the lowest level. (Menu > Messages > (reach the lowest level of info)
inio rip	Dongni	res		desktop version has it opened by delauit)	N/A	selecting the right one.	IOS - Salari	into rip		As with anything text related, they should be made larger for easier
Labels	Adam	Yes					iOS - Safari			viewing on mobile devices
List Group	Dongni	Yes		No. Not the list groups, but the hover over effect.	N/A	Good - given the spacing between items	iOS - Safari	List Group		The hover over effect doesn't transform that well with linked items
						Ok - button and icon sizes should be made		List View Rows		
List View Rows	Adam	Yes		Yes - better wrapping of elements in the list		larger	iOS - Safari	Folder		
Modals	Adam	Yes		Yes	Controls inside of the modal	0	iOS - Safari	Modals Folder		
Modals	Auam	res		res	are using the native features	G000	IOS - Salari	Modals Polder		- Context Selector: the caret icons next to context selector have a
										default state of facing down, but after user-interaction, some return to
										default state of facing down, but after user-interaction, some return to facing down while others become facing up. See screenshots for
				Vac						details When testing iPhone 6 using Chrome developer tool, the logo doesn't
				- Context Selector: it seems like the dialogue						line up with the hamburger menu. See screenshots for details.
		D 4.4		window is not responsive and the window length 1 is determined by the length of the options.		Good - it's usable but some people might	100 0 6 1			 Interacting with the dropdown button in the menu causes a horizontal
Navbar	Dongni	Partially		1 is determined by the length of the options.	N/A	have hard time clicking the right one.	iOS - Safari	Navbar		scroll
Pagination	Adam	Yes					iOS - Safari			Mini size pagination is too small on mobile
Panels	Adam	Yes		V			iOS - Safari	Panels Folder		
				Yes - all the Popover on left can't be seen on phone screen. The "i" icon is too small to interact	Vos. it upon the keyboard	Good - given the spacing between the				
Popovers	Dongni	Partially		with.	input for the text input field.	popovers	iOS - Safari	Popovers		
								Progress Bars		
Progress Bars	Adam	Yes					iOS - Satari	Folder		Text too small on mini/small bars
Search	Adam	Yes					iOS - Safari	Search Folder
